

K-LOVE, 106.7, has been part of our day for years, and the positive outlook it projects benefits our whole family. It's a refreshing change from the appalling content of many other music stations on the dial. If it were to be displaced by an LPFM, which could very likely not contain the same positive material, it would be a great loss to those of us who already find acceptable radio picking pretty slim. There are so many voices on the radio that influence for the negative. K-LOVE is our alternative. Please don't do something that would deny us our favorite station!
